# Dreer's Roses

Novelties and Varieties of Recent Introduction

#### Dormant Stock for Delivery Winter 1933 to 1934

# New Hybrid-Tea Rose, Mrs. J. D. Eisele

#### Protected Under United States Plant Patent Number 67

#### Howard & Smith's Latest and Best Introduction

A Rose of outstanding merit that every Rose lover will appreciate, buds and flowers perfect in every stage of development, perfect habit of growth; free continuous habit of bloom, hardiness, and above all possessing the sweet fruity fragrance of the noted old Tea Roses of fifty years ago.

The buds, the expanding flowers as well as the fully developed blooms of this Rose are absolutely perfect in every stage of development. This is due to the unfurling petals of the long pointed buds which are arranged in spiral form, reflexing as they unfold giving the fully developed flower, which is from five to six inches in diameter, a most perfect camellia-like formation.

Aside from its beautiful shape it is a Rose of exceptional keeping qualities, the cut blooms lasting fully a week in good condition.

Color: In color it is a luscious shade of cherry-rose overlaid with a scarlet glow, this brilliancy being particularly intense and lustrous under artificial light. An unusual feature in the coloring in the open flower and which adds grace and distinction is that the tip of each of the many gracefully placed petals has just the faintest silvery thin wire-like lacing.

Fragrance: We have in this Rose the most delightful fragrance (an important factor that is lacking in many other good varieties), to such an extent that only a few flowers in a vase will serve to permeate the entire atmosphere of the room with their sweet fruity odor, resembling that of the noted old Tea Roses of fifty years ago.

Growth strong, vigorous, erect, of branching habit, very free and a continuous bloomer.

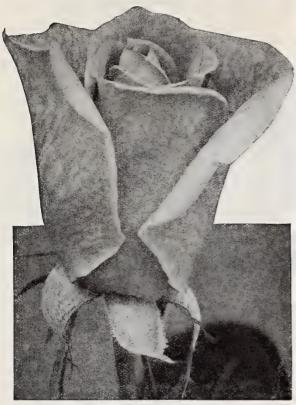

Awarded Gold Medals at the Atlantic City Flower and Garden Pageant, September, 1932, at the International Flower Show, New York City, March, 1933, and at the Philadelphia Flower Show, March, 1933.

Price for strong two-year-old dormant field-grown plants \$1.00 each; \$12.00 per doz.; \$80.00 per 100.

Six or more supplied at dozen rates, 25 or more at 100 rates; special prices will be quoted on larger quantities on application.

Novelties and Varieties of Recent Introduction Dormant Stock for Delivery Winter 1933 to 1934

Hybrid-Tea Rose, Lucie Marie

Autumn (Coddington, 1928). Novel and distinct in coloring, burnt orange streaked and marked with red. Bud of medium size developing into a cupped, double, fragrant, attractive flower. \$35.00 per 100.

Retty Sutor (McGredy & Son, 1929). Exquisite both in the long bud and high-centered, large, double, tea-scented flower. Inside of petals delicate rosy pink; as the flower opens there is a delightful reflecting of the petals which enhances the beauty of the pink tone. Strong, vigorous and free-flowering. \$60.00 per 100.

Eduard Schill (Kordes, 1931). Large ovoid bud and very large, full double flowers. The color as the buds first unfold is of a rich coral scarlet overlying a deep old gold ground, as they develop passing to pretty coral rose with satiny golden suffusion. An effective desirable Rose. \$75.00 per 100.

Frau E. Weigand (Weigand, 1928). Bud ovoid developing to large high-centered globular, shapely, double, very lasting, fragrant Marechal Niel-scented flower; in color a brilliant yellow like Golden Emblem. Hardy, vigorous and free. \$60.00 per 100.

Golden Dawn (P. Grant, 1929). An ideal yellow garden Rose. The ovoid lemon yellow bud is heavily splashed with crimson before opening and develops into a well-formed, sweetly-scented, large, double, sunflower yellow flower that reminds one of the old favorite Marechal Niel. Strong, vigorous and free flowering. \$40.00 per 100.

Heinrich Wendland (W. Kordes Sons, 1930). Buds large, long pointed and very large, double, full, high-centered, intensely fruity fragrant flower of unfading nasturtium-red color, the reverse of the petals a deep golden-yellow. Growth vigorous; flowering intermittently throughout the season. \$75.00 per 100.

Hinrich Gaede (Kordes, 1931). Long-pointed shapely bud of nasturtium-red color. large double high.

100.

inrich Gaede (Kordes, 1931). Long-pointed shapely bud of nasturtium-red color, large, double, high-centered flowers of ideal shape of a color unusual and unlike any Rose in commerce; a rich luminous vermilion shaded golden yellow such as is found in high-colored modern Zinnias. Rich, fruity fragrance. A free and continuous bloomer. \$75.00 per Hinrich Gaede (Kordes, 1931). grance. 100.

100.

Katharine Pechtold (Verschuren-Pechtold, 1933). The moderate-sized, exquisitely pointed buds of old gold and bronzy orange open to moderately filled, coppery orange flowers flushed with rose and gold. The fragrance is delicately sweet, reminiscent of old fashioned Clove Pinks. The plants are bushy, free and continuous blooming. A fine Rose with from 28 to 30 petals, being more than other Roses of similar color. \$75.00 per 100.

Kidwai (Pernet-Ducher, 1933). Long-pointed bud and full, shapely flower. In color a delicate salmon rose overlying a creamy yellow ground; the lower halves of the petals are of a golden yellow. A distinct and pleasing color combination. \$75.00 per 100.

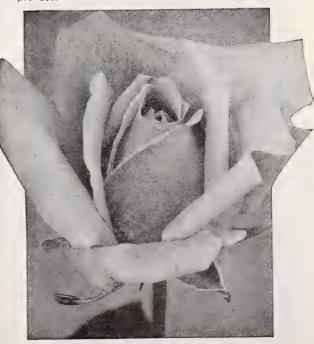

Lucie Marie (Alek Dickson & Sons, 1930). Very long pointed buds, deep yellow splashed rosy red. As the outer petals unfold, the inner face is yellow with coppery venation, the petals lightly tipped pink, slightly fragrant. It is of strong, vigorous, healthy habit of growth with dark leathery foliage. A most distinct and interesting bedding variety. \$40.00 per 100.

Lydia (Verschuren, 1932). Bud long-pointed and moderately large, full, high-centered, perfectly shaped flower of an orange-rose color; of strong, clean, vigorous habit and free flowering; moderately fragrant. \$50.00 per 100.

redredy's Scarlet (McGredy & Son, 1930). A new red Rose of marked superiority on account of its strong vigorous growth, free and continuous habit of flowering and its brilliant color. The flowers are of good size, full double of a brilliant scarlet; orangy yellow at base of petals, the upper portions of same being lightly touched with crimson, varying some in color under changing weather conditions but always beautiful. \$35.00 per 100. Novelties and Varieties of Recent Introduction

r Henry Segrave (Alex. Dickson & Sons, 1932). Large, long, well shaped bud and very large, full, beautiful, high-centered, double flower of a deep lemon yellow shading deeper at base; a free perpet-ual bloomer and sweet scented. \$75.00 per 100.

Swansdown (Alex. Dickson & Sons, 1929). An ideal white which in the autumn has just a tint of cream at the base of the petals. The bud is large, very long pointed of perfect shape, composed of large heavy petals and develop into splendid full, very sweetly-scented flower of spiral formation. \$75.00 per 100.

Victoria Adelheid (Kordes, 1932). Exceptionally large, well-formed, double flowers of a rich golden yellow suffused with vermilion red shading deeper to the edges of the petals. An effective free flowering variety. \$75.00 per 100.

Mrs. Sam McGredy (McGredy, 1929). The color of this beautiful variety is quite distinct from anything yet seen in Roses, a wonderful dual combination of vivid shades. A beautiful scarlet coppery-orange is heavily flushed with Lincoln-red on the outside of the petals, and these colors together give a rich and almost dazzling effect. The flowers are of large size and beautiful form, and they possess the proper fullness to make them useful for all purposes. They are very freely produced and delicately perfumed. The plant has a vigorous and exceptionally free habit and is one of the best all-purpose varieties. \$50.00 per 100.

Olympiad (Pernet-Ducher, 1931). The color of Olympiad is unique, a lustrous, dark oriental-scarlet, its depth and warmth accentuated by a bright golden base and is intensified by a marvelous velvety sheen that makes its rich coloring particularly effective, especially under artificial light. The bud is long and pointed, the petals are very broad and the blossom is magnificent in every stage of development. \$40.00 per 100.

Portadown Fragrance (McGredy, 1930). A
Rose that pleases not only on account of
its beautiful formation and color but also
for its remarkable sweet fragrance, described
by its introducer as surpassing any other
variety. The bud is long-pointed; the flower very large, double, high-centered and
unusually long lasting. Color brilliant orange-scarlet passing to bright rose towards the
edge of the petals; of vigorous habit and free flowering. \$50.00 per 100.

\$50.00 per 100.

Schwabenland (Pfitzer, 1928). There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large, over five inches in diameter, with high spiral center, the petals having a peculiar twist or curl. In color it is a luminous rich rosepink, retaining its brightness until the petals drop, the flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free flowering. \$40.00 per 100.

Vaterland (Pfitzer, 1928). The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid-Perpetual variety Prince Camille de Rohan; a rich, deep, velvety scarlet maroon and a splendidly formed, high-centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and free and perpetual flowering; unquestionably the best of this type that has yet come to our notice. \$40.00 per 100.

#### EXPOSITION PINK

(Named in Honor of "A Century of Progress" Exposition in Chicago)

in Chicago)

EXPOSITION PINK can best be described as a gorgeous rich pink, rather resembling the color of the well known Ivy Leaf Geranium "Charles Turner" but a trifle lighter. This is one of the richest and most fascinating colors ever introduced in Sweet Peas and is a knockout when used at night under artificial light. EXPOSITION PINK is one of the most vigorous Sweet Peas we have ever introduced. The blooms, four to a stem, are very large, wavy and well spaced. The stems are long and stout and the plant is an extremely prolific producer of blooms over a very long flowering period. TRUCK AND LEAF RACK

# Dreer's Celebrated Lawn Grass Seeds

Lawns made in the Fall have many advantages over those made during the Spring, as the conditions are ideal for quick germination of seed, and grass will make deeper roots and more healthy growth. We use only the high-cheap annuals such as Timothy are included for we seed in the composition of our lawn mixtures. No but temporary effect. Put up in attractive and convenient-sized cartons, they make a very necessary and profitable side line for every Florist to stock.
